-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-3 and 6 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. **Claim 1-3 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Kato et al. (US 2003/0063230).**

4. Regarding claim 1, Kato discloses an LCD device (see figures 12 and 13, for instance) comprising: a back light assembly ([0054]) that generates a first light to transform the first light into a second light having modulated optical characteristics; a receiving container (10) having sidewalls and a bottom face, the bottom face including a plurality of sockets (17) depressed below the bottom face for fixing the liquid crystal display device (10a) to an external member, the sockets (17) each having different diameters including a smaller diameter entrance portion; a bottom pan (20) having tabs for embracing the sidewalls of the receiving container (10) and a plurality of projecting

plugs (27) each having a substantially curved shaped portion receivable into the sockets (17). Claim 1 is therefore unpatentable.

5. Regarding claim 2, Kato discloses the liquid crystal display device of claim 1 (see figures 12 and 13, for instance), wherein the sockets (17) each have a diameter corresponding to a width of the curved shape portion of the projecting plugs (27). Claim 2 is therefore unpatentable.

6. Regarding claim 3, Kato discloses the liquid crystal display device of claim 1 (see figures 12 and 13, for instance), wherein the sockets (17) are formed at corners of the bottom face of the receiving container (10). Claim 3 is therefore unpatentable.

7. Regarding claim 6, Kato discloses the display apparatus of claim 5 (see figures 12 and 13, for instance), wherein the sockets (17) each have curved shape corresponding to the curved shape portion of the projecting plugs (27).
